i would just tell them we're listing the site, and we've been down the road already with dep - they've referred it to us. we can then deal with them on the aoc in the coming months

The attorney just called to tell me her client would like another 2 months before responding to our AOC. She says the client is seeking to get DEP to retake control over the site (DEP apparently has control of other parts of the site, according to her) and that there is also litigation regarding title to the property which will take some time to resolve.
